About Glass4ever

Glass4ever design, produce and sell unbreakable drinking glassware all over the world.

The products are made of different kinds of specially developed plastic ensuring that the glasses never break; pieces of broken glass are not left lying around and cannot be used as a weapon.

Our products are used wherever focus is on safety, working environment and economy. All our products have been tested by independent laboratories and are food approved.

We offer the best quality in the market – our glasses look, weigh and feel exactly like ordinary glasses.

We are a 100% Danish owned company located in Vejle, Denmark.

Logo on glas

We also produce glasses with logo to several large companies. If you need further information about quantities, prices, etc. please feel free to contact us for a quote. Glass4ever can "tailor-make" all glasses, giving our customers a unique glass according to their own target price. There are no limits – any design can be created!

Why change to unbreakable glassware?

Top Quality - our unbreakable glassware looks and feels exactly like real glass.

You save money - unbreakable glass is CHEAPER in the long run.

Increased safety - the glasses cannot be used as a weapon.

Reduced weight - improves your staff's working environment.

Less cleaning - spend more time on your customers instead of wasting it on sweeping up broken glass.

Excellent insulation - keeps cold drinks colder and hot drinks hotter. Freeze the glasses in 5 min. and serve the drinks ice-cold.

Uses less CO₂ in the production and cargo compared to ordinary glass.

Less wear and tear on furniture - broken glass will not be trodden into the carpet/floor.

Uses less space than ordinary glass because more items can be stacked on top of each other.

Suitable for restaurants, cafés, nightclubs, discotheques, promotion, events, hospitals, child care institutions, universities, schools, nursing homes, prisons, hotels, resorts, airlines, cruise ships, trains, holiday cottages, boats, camping, spas, swimming pool areas, entertainment parks, stadiums, concerts, etc.

Glass4ever and the climate

Unbreakable drinking glass of plastics also play a role in solving the climate challenge. Plastic saves already the world for millions of tons CO₂, and there is a good opportunity to save even more.

Lots of everyday items are made of plastic. Low weight and other material properties that plastics contribute significantly to solving our climate challenge.

All of our materials are 100 % recyclable.

How to clean Glass4ever

The products can be cleaned in exactly the same way as ordinary drinking glasses. They can be hand-washed, washed in an ordinary dishwasher or in an industrial dishwasher. You can use the same detergent you normally use for washing. There are no special requirements.

We would recommend that you read our washing instructions on www.glass4ever.com.

Best result

If you want the best treatment for your Glass4ever products, we recommend that you use our Proton dishwashing products. Proton specializes in the supply of high technology, cost effective and innovative cleaning and disinfection dishwashing products.
